Martin Šuba

Engineering manager

About

Engineering manager with a strong frontend background and experience across product development, delivery, and team leadership. I started in frontend engineering, building web applications, browser extensions, and JavaScript/TypeScript products, and later moved into broader roles focused on delivery, automation, and execution.

Experience

Engineering Manager

F-Secure Corporation

January 2025 - Present

Bratislava, Slovakia

Leading the Solution Implementation team responsible for configuring, releasing, and delivering cybersecurity solutions to partners, while overseeing internal automation and delivery tooling development. In this role, I focus on improving delivery tooling, automating internal processes, and developing internal tools that bring value by improving workflows, reducing manual effort, and making delivery more efficient and reliable.

Technical Project Lead

F-Secure Corporation

February 2025 - December 2025

Bratislava, Slovakia

In addition to my Engineering Manager responsibilities, taking on a side role as TPL. Managing Tier-1 partner deliveries end-to-end, coordinating cross-team work, and improving delivery processes in a dynamic environment.

Lead Frontend engineer

F-Secure Corporation

June 2023 - December 2024

Bratislava, Slovakia

Led frontend development of password manager clients, including browser extensions and SDKs for JavaScript, iOS, and Android. Worked in a dynamic post-acquisition environment, integrating both the team and product into a new organizational structure while aligning with company standards. Delivered full lifecycle solutions, coordinated cross-team execution, and mentored engineers while driving best practices.

Lead Frontend engineer at SaferPass (acquired by F-Secure)

Lookout

May 2022 - May 2023

Bratislava, Slovakia

SaferPass Password Manager, by F-Secure

Javascript Developer (acquired by Lookout)

SaferPass

October 2017 - May 2022

Bratislava, Slovakia

Taking care of front-end part of SaferPass password manager browser extension. Mostly working with javascript/typescript, angularJS, React, web extension API, web API, node.js. Implementing new features as well as refactoring legacy code and writing unit tests.

Front-end web developer

WEZEO

September 2015 - September 2017

Bratislava, Slovakia

Building front-end of responsive cross-browser/platform web and mobile applications. Working mostly with HTML, SASS, Javascript, jQuery and frameworks like AngularJS, Angular and Ionic.

Front-end web developer

Elite Solutions

April 2014 - August 2015

Bratislava, Slovakia

Creating web sites and user interfaces using HTML, CSS and JavaScript. Cooperating with graphic designers and back-end developers. Working for clients like O2, Sberbank, SLSP, VÚB and Hyundai.

Front-end web developer

pelicantravel.com

April 2013 - March 2014

Bratislava, Slovakia

I focused mainly on coding web pages, coding e-mail newsletters, customizing WordPress templates and some other online marketing activities.

Coder

webikon

November 2012 - March 2013

Bratislava, Slovakia

Wordpress themes coding (HTML + CSS)
