Martin Šuba

Engineering Manager

About

Engineering Manager with a strong background in web product development across JavaScript / TypeScript, React, and Node.js. Combines hands-on engineering experience with team leadership, technical ownership, and close product collaboration. Strongest in leading product engineering teams in web-based environments, shaping technical solutions, improving execution, and delivering user-facing products in changing environments.

Experience

Engineering Manager

F-Secure Corporation

January 2025 - Present

Bratislava, Slovakia

Leading the Solution Implementation team responsible for configuring, releasing, and delivering cybersecurity solutions to partners, while overseeing internal automation and delivery tooling development. In this role, I focus on improving delivery tooling, automating internal processes, and developing internal tools that improve workflows, reduce manual effort, and make delivery more efficient and reliable, including AI-orchestrated workflows and agentic automations. Current automation initiatives are reducing manual effort by up to 80% in selected internal workflows.

Technical Project Lead

F-Secure Corporation

February 2025 - December 2025

Bratislava, Slovakia

In addition to my Engineering Manager responsibilities, took on a side role as Technical Project Lead, managing Tier-1 partner deliveries end-to-end, coordinating cross-team execution, and improving delivery processes in a dynamic environment. Worked across engineering and stakeholder groups to keep delivery aligned, unblock execution, and drive complex customer-facing releases.

Lead Frontend engineer

F-Secure Corporation

June 2023 - December 2024

Bratislava, Slovakia

Led frontend development of password manager clients, including browser extensions and SDKs for TypeScript, iOS, and Android. Worked closely with Product and engineering stakeholders on integrating SaferPass technology into F-Secure products and apps, discussing technical feasibility, feature integration, and UX coherence to ensure the combined experience made sense for users. Led the technical solution for delivering SaferPass technology as a component in the F-Secure SDK, including integration across web and native technologies. Owned architectural direction in this area, coordinated cross-team execution, and helped deliver a successful SDK release for a Tier-1 customer, enabling launch of a new product offering.

Lead Frontend engineer at SaferPass (acquired by F-Secure)

Lookout

May 2022 - May 2023

Bratislava, Slovakia

Started taking on team lead responsibilities while continuing hands-on frontend development of the SaferPass web product and browser extension. Worked across product and engineering during the acquisition period, helping maintain delivery continuity, support the team through change, and contribute to the transition of the product into a larger organization.

JavaScript Developer (acquired by Lookout)

SaferPass

October 2017 - May 2022

Bratislava, Slovakia

Worked as a JavaScript developer in a small, product-focused startup environment, building the frontend of the SaferPass web-based password manager and browser extension. Worked across JavaScript / TypeScript, AngularJS, React, Web Extension APIs, Web APIs, and Node.js to deliver new features, refactor legacy code, and improve test coverage.

Front-end web developer

WEZEO

September 2015 - September 2017

Bratislava, Slovakia

Built responsive cross-browser web and mobile applications using HTML, SASS, JavaScript, jQuery, AngularJS, Angular, and Ionic.

Front-end web developer

Elite Solutions

April 2014 - August 2015

Bratislava, Slovakia

Built websites and user interfaces using HTML, CSS, and JavaScript, collaborating with designers and back-end developers on client projects for O2, Sberbank, SLSP, VÚB, and Hyundai.

Front-end web developer

pelicantravel.com

April 2013 - March 2014

Bratislava, Slovakia

Built web pages, e-mail newsletters, and customized WordPress templates, while also supporting related online marketing activities.

Coder

webikon

November 2012 - March 2013

Bratislava, Slovakia

Built WordPress themes using HTML and CSS.

Education

University of Economics in Bratislava

Management

2013 - 2015

Master's degree

University of Economics in Bratislava

Business Economics and Management

2010 - 2013

Bachelor's degree

Skills

Leadership & Delivery:

engineering leadership, team leadership, delivery ownership, product collaboration, cross-functional collaboration, process improvement, agile delivery

Engineering:

JavaScript/TypeScript, React, Node.js, frontend architecture, browser extensions, web and native integration, CI/CD, testing, Angular, Git, Webpack, npm

AI:

AI-assisted development, LLM prototyping and automation, Anthropic / Claude ecosystem
